

new Falcon high roof van  
space, prestige, performance

92 cubic feet of cargo area opens up great business possibilities! You'll also profit from Falcon's good looks and display panels. You get more for your money, with standard features. Inside, a 41" height makes way for a 57" width, and 67.5" long loads (with tailgate up). You don't have to lift anything more than 23" from the ground. Opening the counter-balanced tailgate and rear window allows effortless single-handed operation.

The fully insulated driver's cabin seats three big people in comfort. Power is up, and more responsive. Two high-torque 'Sixes' or Mustang V8. Manual or Automatic. Wide-track is still the widest (58.9 inches).

**See how much more you get as standard in Falcon . . . at no extra cost!**

Falcon High Roof Van is a *true-engineered* 13 cwt. load carrier with construction, features and specifications that leave the others way behind.

**STRONGEST SUSPENSION:** Two-stage, seven leaf springs for a car-like ride, laden or unladen. **STRONGEST REAR AXLE:** A special one (as standard) with bigger than usual power and load ratings. **STRONGEST CHASSIS:** Only Falcon is built with a "Torquebox" chassis, providing greater strength and rigidity than conventional body shell construction. **BIGGEST WHEELS AND TYRES:** You need bigger wheels and tyres than usual; Standard with Falcon are 14 inch wheels with 6JJ safety-rim wheels and 7.75 x 14 — 6 ply low-profile tyres. **ALL-STEEL CONSTRUCTION:** Main floor area is one-piece welded steel with integral skid strips, reinforced with stronger floor-to-frame construction and heavy gauge key structural sheet metal. **CLUTCH:** With Falcon's more rugged manual transmission, standard is a 9 1/4 inch dia. diaphragm spring hydraulic clutch (77.8 sq. ins. friction area). With Mustang V8 and manual transmission it's even bigger at 10 ins. dia. (85.5 sq. ins.). **BRAKES:** Standard brakes have a lining area of 154.4 sq. inches. And they're thicker linings, bonded to the shoes for longer life. Front brake drums are solid cast for cooler, fade-free action. Optional front brakes are 11 1/4 inch diameter ventilated and Turbo-cooled power discs; featuring floating calipers.
